

## **2024 Limited Warranty**

Smittys Only Son Enterprises LLC dba ViteWall warrants to the direct purchaser of VITEWALL DIY Drywall Alternative 1/2" Polypropylene (PP) panels they will be free from manufacturing defects when subjected to normal use as an interior or exterior wall. VITEWALL Owner John D. Smith ships two (2) extra free panels with every retail or wholesale order as a hedge against the top and/or bottom panels being damaged in shipping transit.

## **Recommended Storage before installation**

Before installing your ViteWall plastic panels, we recommend you store them inside your garage or barn, out of direct sunlight. You can either stack them flat or lean them against a wall (such as an existing ViteWall 😊). If ViteWall panels are leaned against a wall, you should not lean heavy items against them.

## **Outdoor Service Temperature Range**

ViteWall 1/2" Polypropylene Panels can be installed in weather (-30F) to 120 F

## **Warranty Exclusions**

This warranty does not provide protection or replacement against any failure or damage caused by situations and events beyond normal exposure conditions, including but not limited to:

- Misuse/improper handling or storage (i.e. leaning a heavy auger against the panels).
- Damage caused by Acts of God such as fire, flood, earthquake, avalanche and/or hail.
- Failure to install or use the ViteWall product in accordance with the detailed printed installation instructions and installation video on **[www.vitewall.com](http://www.vitewall.com)**.
- Use or installation outside the parameters of ViteWall DIY Drywall Alternative. Prohibited uses include: roof decking, subflooring, roofing, covering skylights, etc. ViteWall was designed to use in place of standard drywall and go in places that drywall cannot, such as outside in wet and rainy weather and in high moisture environments.
- ViteWall is neither Building Code-approved/rated, nor fire tested and should not be used in new home construction or any activity to meet the local building code for walls.
